

What Is Claimed Is:

1. An aqueous emulsion composition comprising;
a high-solid-content emulsion compound which comprises;

5 (A) 100 parts by weight (solid basis) of at least one latex or emulsion selected from the group consisting of styrene-butadiene copolymer latices, acrylic resin emulsions, ethylene-vinyl acetate copolymer emulsions, acrylonitrile-butadiene copolymer latices, urethane resin emulsions, and natural rubber latices,

10 (B) 0.3 to 2 parts by weight of a dispersing agent,
(C) 0.5 to 5 parts by weight of a crosslinking agent,
(D) 0.1 to 4 parts by weight of an anti-foaming agent,
15 and

(E) 100 to 600 parts by weight of at least one powdered filler selected from the group consisting of calcium carbonate, aluminum hydroxide, silica sand, and barium sulfate; and

20 (F) 0.5 to 30 parts by weight of a polyisocyanate compound having reactive isocyanate group, wherein the polyisocyanate compound is added to the high-solid-content emulsion compound.

2. A method of backing a carpet, comprising the steps of applying said aqueous emulsion composition according to claim
25 1 to the back of a carpet, and thermally curing and then drying

the emulsion composition applied.

3. A method of backing a carpet, comprising the steps of
applying said aqueous emulsion composition according to claim
1 to the back of a carpet, laminating a fabric to the
5 composition-applied surface of the carpet, and thermally curing
and then drying the emulsion composition applied.

4. A carpet backed by the method according to claim 2.

5. A carpet backed by the method according to claim 3.
